

Simple and Innovative
Logo Creation Software

About Logosmartz

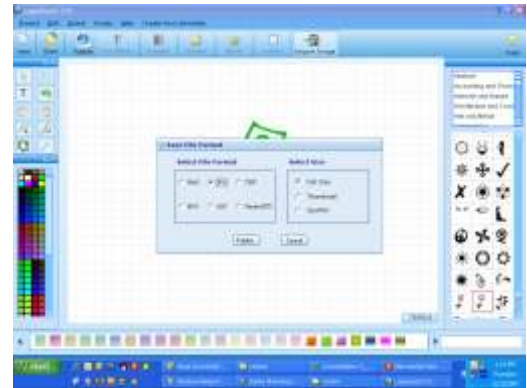

Logosmartz is the most simple and innovative logo creation software where you can create your own logos in a fraction of minutes. Logosmartz lets you customize logos to meet your business needs and is ideal for both print as well as the online usage.

The tools incorporated in Logosmartz have been designed in such a manner that anybody who does not even have the slightest knowledge of Graphic designing, can very easily use the software. With over 400 professionally designed logo templates and around 4000 graphic symbols to pick from, Logosmartz is the most preferred choice.

Output in 6 formats and in a size you want

Logosmartz can deliver the output logo in TIFF, JPG, GIF, PNG, EPS and Vector EPS formats. The Vector EPS is most ideal for printing while the GIFs and JPEGs are low resolution and are ideal for the Web. On the other hand, with the TIFF and PNG formats the output is of premium quality and clarity. Thus, if you are looking for logo software to answer to all your printing and publishing needs, then Logosmartz is what you have been looking for and our huge clientele is a testimonial to the same.

Creating the Logo

Logosmartz's the best choice with beginners who are trying their hand at designing their own logos. Be it creating a logo from scratch or creating a logo from a template, Logosmartz gives you very fast and good quality output in no time. No wonder, Logosmartz has established itself as the most favored choice with maximum online business establishments the world over. Coupled with excellent speed and extremely user friendly tools, it has established itself as the most preferred, cost effective logo creation tool.

Customizing your logo

Logosmartz keeping in mind the design aspects, has been designed to give maximum customizing options to its clients. If you have the creative streak in yourself then Logosmartz is bound to quench your artistic vision. You can pick a symbol from our database of 4000+ symbols, choose a font from the 100 fonts available and if this was still less, upload a symbol of your choice. You can further apply the Gradient effects, Shadow effects, Bevel effects, and not to forget the Outline effects to your logo. And if you think this was not enough Logosmartz offers several predefined styles that you can apply on logo objects, text, and images. Also, the best part is you can try designing your logo as many times as you want till the time you reach your perfect logo.

Thus, by applying these styles you can create various remarkable variations of your logo in no time.

Extremely user-friendly interface

Logosmartz interface is extremely user-friendly, where you can try and incorporate any number of logo creation templates and can create a great logo in minutes.

Logosmartz the upper edge

What sets Logosmartz a class apart are the added features that we provide you. With us, you can select multiple objects using the mouse at one time, thus allowing you to move and change orientation of the multiple logo objects simultaneously. Further to facilitate the usage of the Logosmartz logo designing software, we have an online tutorial.
